

# U.S. ARMY SUSTAINMENT COMMAND

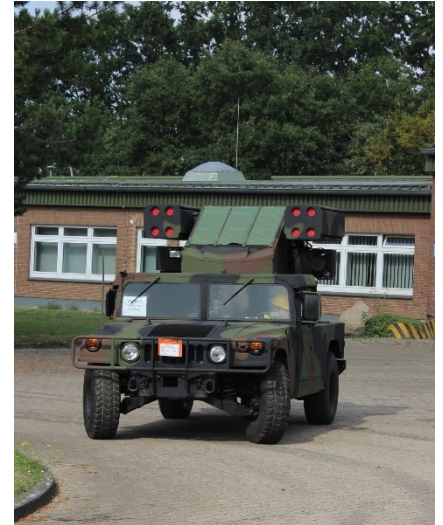

## 405TH ARMY FIELD SUPPORT BATTALION - MANNHEIM

AFSBn-Mannheim, headquartered at Mannheim, Germany, is one of the four battalions of the 405th Army Field Support Brigade.

AFSBn-Mannheim provides mission command of Army Preposition Stocks operations at Duermen, Germany, and Coleman worksite, Mannheim.

The battalion is tasked with providing and coordinating receipt, transfer, storage, and maintenance of APS operations.

AFSBn-Mannheim enables commanders to conduct unified action and a full range of military operations in support of U.S. Army Europe (USAREUR). The APS stored in Europe are designated APS-2.

APS-2 site Duermen provides over 632,000 square feet of climate-controlled warehouse space (eight warehouses) and 175,000 square feet of hardstand storage to hold and maintain equipment designated for division headquarters and a division artillery brigade.

The Coleman Worksite holds and maintains equipment designated for an armored brigade. The equipment is destined for a NATO-funded APS storage facility that will be built in Powidz, Poland providing an additional 600,000 square feet of climate-controlled warehousing with a robust maintenance facility.

Both APS sites are part of the European Reassurance Initiative and facilitates NATO's rapid deterrence options.
